How can your agency qualify if their client is a good fit for Shortlist?

Qualifying criteria	Description	Perfect match
Your client is specifically looking to boost their organic presence	<ul style="list-style-type: none">- grow organic traffic to their website- increase the # of organic keywords that they rank for- boost the ranking of those organic keywords to higher positions in SERPs	
Your client operates in a highly competitive organic landscape	<ul style="list-style-type: none">- your client is in a space with a lot of competition organically- there is significant monthly search volume for organic keywords your client wants to rank for which justifies the link building effort	
Your client has a well-functioning website	<ul style="list-style-type: none">- your client has an operating website complete with essential content and business information- websites with poor UX and SEO issues are NOT a match for the link building service; those issues must be resolved before launching any link building work	
Your client does NOT have a brand new, freshly launched website	<ul style="list-style-type: none">- you should make sure that your client is already ranking for some organic keywords as a brand new website is not a good fit for the link building service- positions within the 30-60 range are more likely to benefit from link building than positions beyond >100 in SERPs	
Optional: Your client has existing low-hanging fruit opportunities	<ul style="list-style-type: none">- your client already has valuable, linkable content published on their blog, especially if it's already ranking in search. Building backlinks to such content typically boosts its rankings to higher positions in SERPs within a much shorter period of time	

A rigorous website vetting process is our key differentiator

Unlike most agencies, we go beyond just DA and traffic numbers and identify best-in-class resources with real potential to boost your client's backlink profile.

Our metrics	Description	Typical SEO agency	"Good" SEO agency	shortlist.
